

# Plug-in Assembly and Installation Instructions

**Easy to install. No electrician required.**

Safety Precautions for Installation:

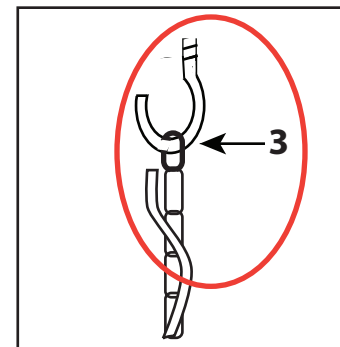

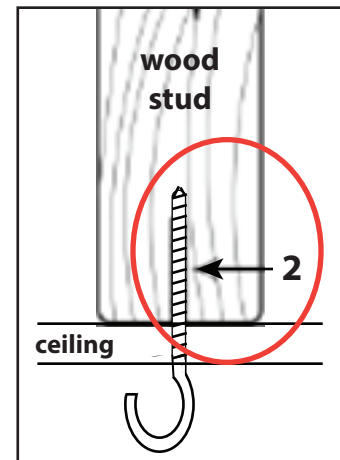

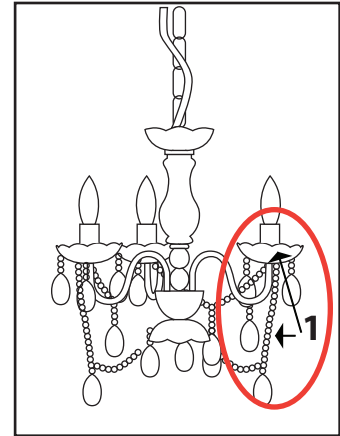

- This lamp is for indoor use only
- Do not allow lamp to become wet
- Maximum 40 Watt E12 chandelier light bulbs (light bulbs not included)

This Chandelier can be placed anywhere you would like in your home, as long as an electrical socket is within reach of the 17 ft. cord connected to the chandelier.

Plug-in Assembly & Installation Instructions:

1. Open box, pull the chandelier out of the box, unfold arms to the correct distance and re-attach the chain of beads between the arms. Open the white box, remove the cups with crystals and place on each arm over the light bulb socket.
2. Use the screw hook provided. You must locate a wood stud behind the dry wall in order to firmly connect hook and chandelier to your ceiling. Drill a pilot hole slightly smaller than the threaded screw. Then install the screw.
3. Chandelier must hang from the chain. It is not safe to try to hang by cord only. Once you have decided on the preferred height, connect that loop of the chain to the hook. Excess chain can be removed with two plyers and leverage.

**Note:** Check to make sure that all crystals are in place. If not, inspect packaging carefully as crystals may have come loose during shipping. **Contact Us directly to request replacement of any missing parts.**
