

## Plug-in Assembly and Installation Instructions

Easy to install. No electrician required.

Safety Precautions for Installation:

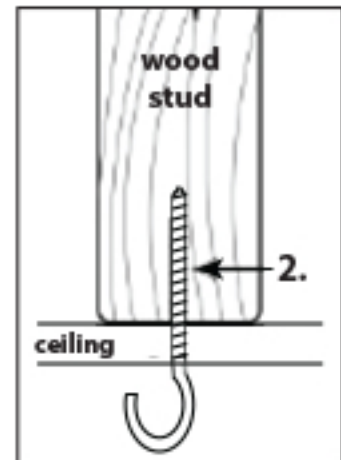

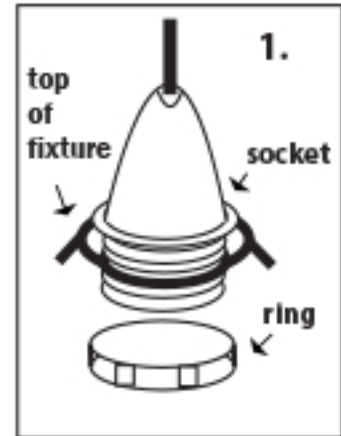

- This lamp is for indoor use only
- Do not allow lamp to become wet
- Maximum 40 Watt E12 chandelier light bulbs (light bulbs not included)

This Chandelier can be placed anywhere you would like in your home, as long as an electrical socket is within reach by the 16 foot cord connected to the chandelier.

Plug-in Assembly & Installation Instructions:

1. Open box, pull the chandelier out of the box, carefully unwrap all packaging. Unscrew ring from socket and slip the socket through the top of the fixture and screw ring back onto socket to secure the socket to fixture.
2. Use the screw hook provided. You must locate a wood stud behind the dry wall in order to firmly connect hook and chandelier to your ceiling. Drill a pilot hole slightly smaller than the threaded screw. Then install the screw.
3. The fixture comes with a component that allows for adjusting the cord so the fixture hangs from the desired distance from the ceiling. Adjust by sliding the cord through the two lower holes in direction needed to shorten or lengthen cord. The top hole is for hanging the fixture on the hook.

**Note:** Check to make sure that all crystals are in place. If not, inspect packaging carefully as crystals may have come loose during shipping. Contact Us directly to request replacement of any missing parts.

If you have any issues at all, we want to hear about it! The best way to resolve any product related issue is to email: [info@gypsyncolor.com](mailto:info@gypsyncolor.com) or call: 512-593-1324. Our goal is to exceed your expectations with our chandelier and customer service. We would also love to see a picture of your newly decorated space—you can upload a picture along with your product review at Amazon.com.
